The Conning Tower

Loon River Anthology. BY OUR OWN EDGAR LEE MASTERS." CLEOPATRA.

Here I lie under the sands Of Egypt. When people called me beautiful, Because I happened to be a Queen, I knew I was not. But I made the most of my opportunities. Ask J. Cæsar. Ask M. Antony. Poets, who had never seen me, Did the rest, when, After a snake had bitten my left, great toe, I died of fright.

It's all very well to call a man a thief, But how would you have liked to go hungry

Out in the snow of the streets Before Paris was "la Ville Lumiére"; And with wolves about?

Poetry didn't get me far, either. I was good at it;

But it was too complicated in my day, Too hard to write. It cut into a man's leisure time. So, what with women, and dice, And other essentials,

I needed the money.

And so they strung me up. You writers of free verse,-before you condemn me. Remember!

If you had to write Ballades for a living, As I did,

You might pick a pocket yourselves sometimes. DANTE.

Folks thought I had been in Hell. Because I wrote a poem about it, And looked grim and sad. But it was really my wife, Jealous of Beatrice and who couldn't cook. So, between indigestion, and the sound of her tongue, I grew sour on life. Ye, who stand by my tomb in Ravenna, Look, and pass on. Others may be waiting.

QUEEN VICTORIA.

People thought me a model wife and mother, And great poets praised me; All except Swinburne. But all the same, I did read "Laus Veneris" once, On the sly. I liked it, too. SWINBURNE.

I died in time, I could not live in a world Where this sort of thing

Is called verse. I call it (Deleted by the censor.)

Thrift, economy, efficiency—these, we are told in school, in some colleges and in most businesses, are whereby we shall prevail. It is barely possible that if the Cunard Line had been less thrifty,-so the inquiry tends to show-the Lusitania might have traveled with greater speed through the war-zone. If Harris & Blanck, of Triangle Fire memory, had been less economical, there might have been more fire-escapes on the building. More lifeboats on the Titanic might have-well, thrift, economy and efficiency are not without their disadvantages.

Any Relation to the Man Who Couldn't Tell Whether Clamdigging Were Fishing or Agriculture?

Sir: Have you heard of the man who couldn't make up his mind whether washing windows was an indoor or an outdoor sport? MAY IRWIN.

> THE WOBBLING OF HUMOR. You, too, in turn may have a son,

And marvel how he finds his fun In wheezes where you notice none

For here, on this terrestrial ball, But Humor wobbles most of all.

tion of a double romance in the two families.

In honor of the marriage of his favorite niece of James B. Duke threw open his entire magnificent estate of 5,000 acres for the 500 guests from Philadelphia and New York. Special trains from both cities were run direct to the farm, where automobiles were waiting to transport the arrivals through winding roads to the mansion.

The conservatory had been transformed into a chapel of flowers, American beauties being banked behind the altar of blossoms and two pillars of Easter lilies forming a gateway to which the satin ribbons led. Through the French windows the fountains could be seen playing.

Forty-four boys and girls went to the country yesterday. They made up the first Tribune Fresh Air Party of the summer.

There was not a hale and hearty

Every one of them had just come from a sick bed at home or in the hospital. One boy in the party hobbled his way abcard the train at the Erie station with the aid of a new pair of crutches, made necessary by an injury to one of his legs which has kept him in a hospital ward for weeks. Two or three others gave evidence by their limping gait of more or less recent injuries.

Most of the rest dragged listless feet. Even the knowledge that they were bound for Fresh Air land to re-gain health and strength failed to put life into their step.

Cheating the Robins.

Truth to tell, it would seem as though the coming of these little lads and lasses—one of them is only four years old—must have been anticipated years and years ago, for down at the foot of the fill, back of the house, are three cherry trees. They are loaded with spoils, too. The robins have been watching with jealous eyes until the time—and the cherries—should be ripe for attack, but they will have to do their sly pecking elsewhere now.

There are the shade trees in the hollow, too. and the brook that dances through the ravine across the road, the spring that bubbles from the rocks and the dissies that bloom in the meadows and the dissies that bloom in the meadows all evidences that, long years ago, all evidences that, long years ago, all evidences that, long years ago, and the food of the house, are three cherry trees.
